Man in the Middle Threats in Public Wifi

Man in the Middle

- Networks packets are intercepted by the attacker who can see and alter its content
- Attacker impersonates another actor
- Stealing information

Sniffing / Eavesdropping

- Sniff packets in a network
- Dangerous if network is unencrypted
- Messages, passwords, emails, could be visible to sniffer

Router Spoofing

- Attacker creates a fake wifi impersonating a legitimate wifi
- When a user is connected, the attacker can monitor every activity
- Steal data
- Cheap and easy to setup a fake wifi

Demonstration
